3.2 Tour Approval State Diagram.....	7
4. Sequence Diagram.....	8
4.1 Tour Guide Application Sequence Diagram.....	8
5. Class Diagram.....	9
6. Mockups.....	10

1. Non-function Requirements (NFR)

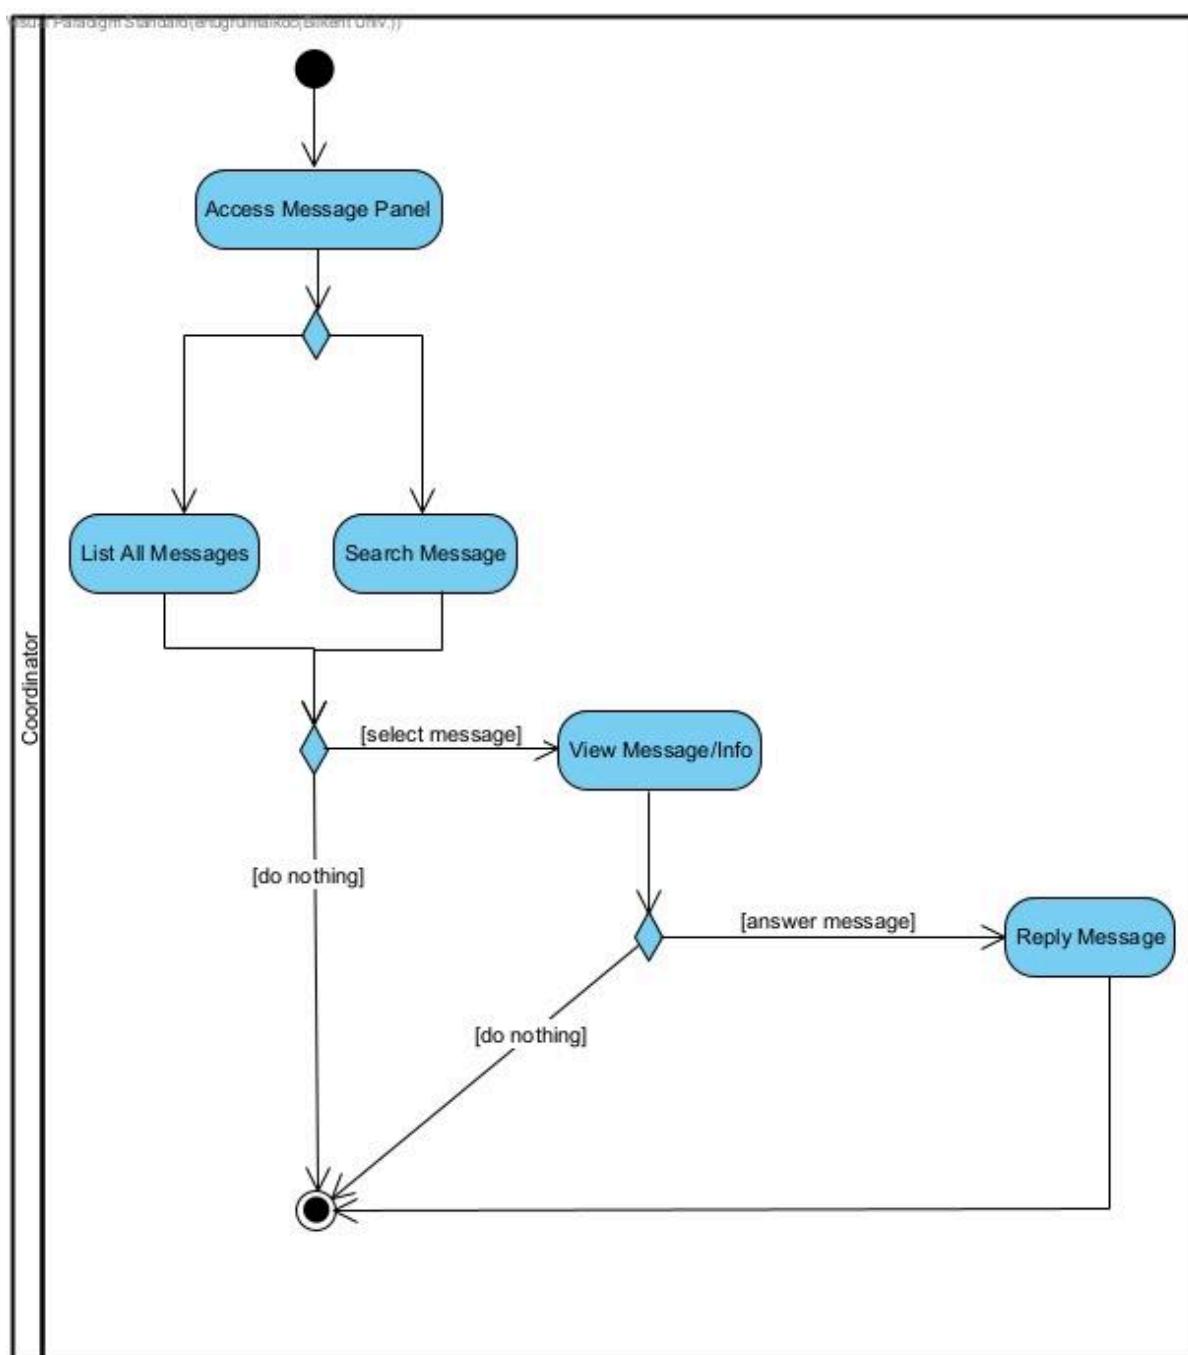

1. The user interface should be responsive and load data from the database in less than 5 seconds
2. The system shouldn't be down for more than an hour as any downtime more than that is going to delay tour logistics.
3. Input errors should be illegal and will be given an error message to the user when an unallowed character (emojis, foreign language letters, etc.) or format (example: a string for a date) is given as an input, for safety and organization of the database.
4. User passwords should be kept as hashes in the database to ensure privacy and satisfy cybersecurity concerns.
5. The users can access the system from desktops, mobile phones, tablets and laptops.
6. The access to the data panel and databases should be permitted to any other users rather than the owner of Bilkent Tanıtım Ofisi.

2. Activity Diagram

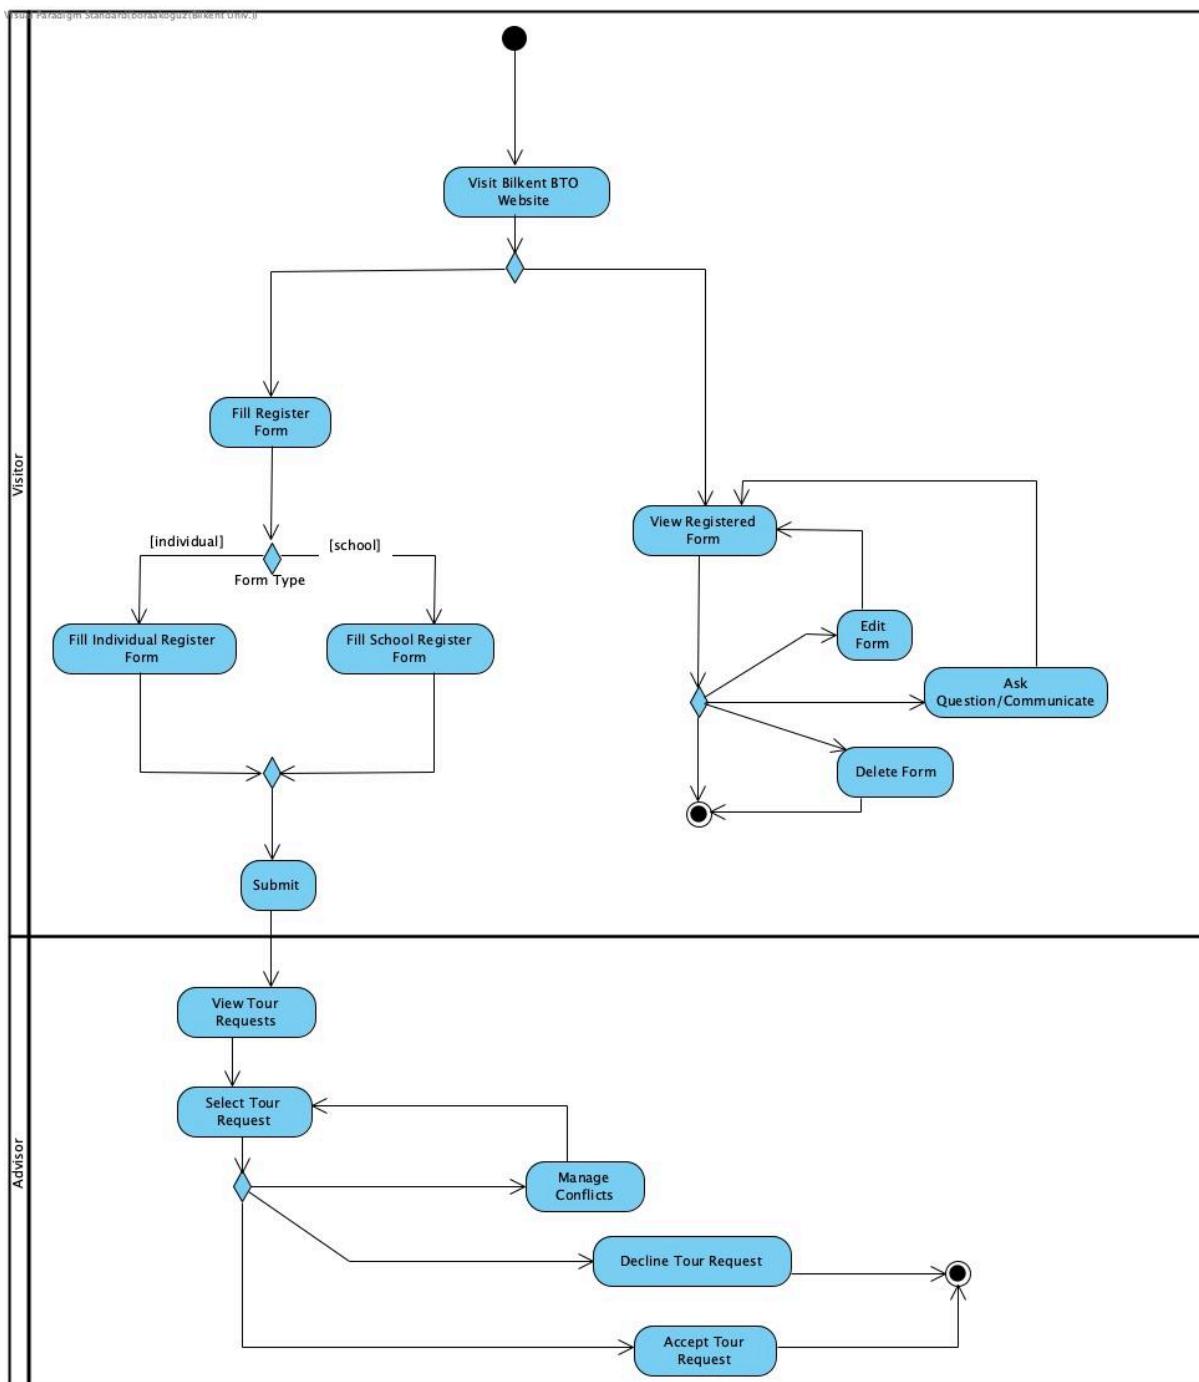

2.1 Guide Application Process

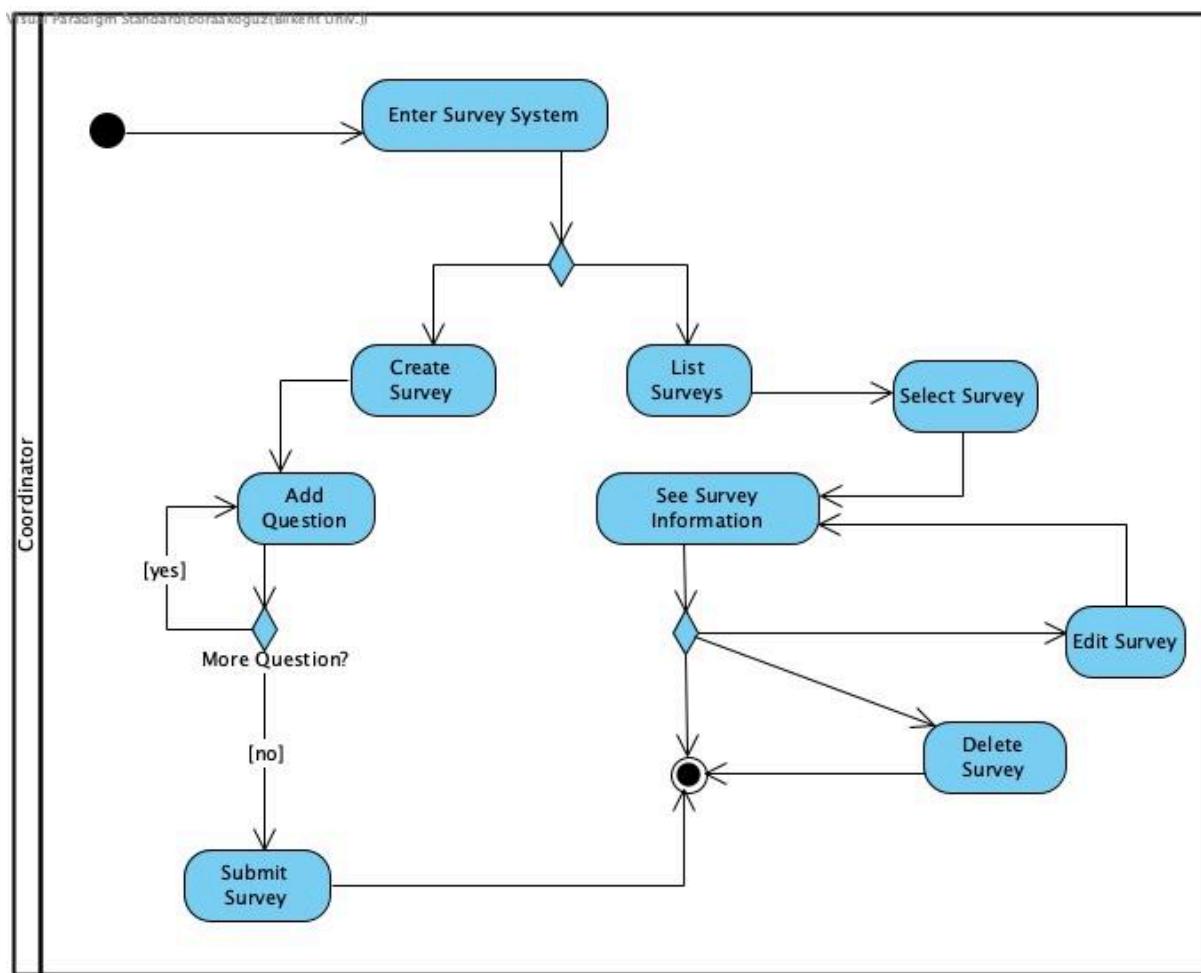

2.2 Messaging System Workflow

2.3 Tour Registration System Workflow

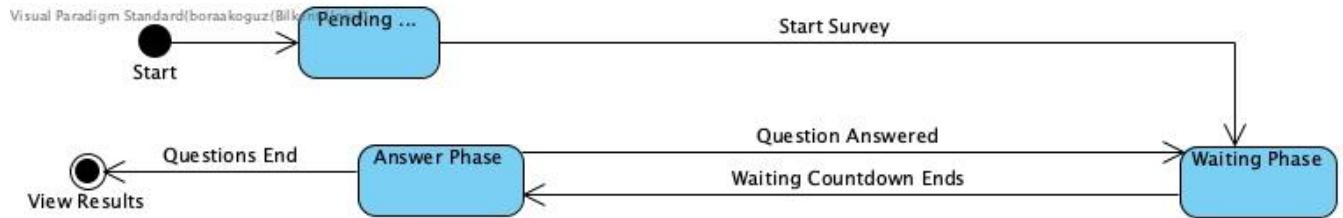

2.4 Survey Submission Process
